

PLAN BLUI

Blui has come from the planet **Babazadeh**, taking the form of a popular meme cat from his home, combined with a mashup of Earth's most loved cats; from Top Cat, Tom, Fritz, and Garfield, to Blue Cat, Doraemon, Sylvester and the Cat in the Hat. He's come a long way to bring positive change in these turbulent times. His first focus is on healthcare, as it crosses cultural and political boundaries. For we'll **all need better care**.

65% of the world is caring for someone and they use apps to support their daily care needs. But they get no financial benefit from their digital care work, online purchasing, or from their data they generate.

Blui's first mission is to support **ReMeLife**, the **world's first Web3 rewards-based health & social care platform**.

ReMeLife leverages daily care actions and democratises personal data ownership. A 'Care to Earn' tokenomics 'gamifies' care, and enables Members to passively earn REME tokens

- Sharing news & content
- Building a personal network
- Trading their data
- Posting in the forum
- Participating in ReMe Market
- Other Care Actions, including NFT's

BLUI token special features

- Blui VIP Club membership
- Blui NFT Collection launch priority
- REME token Pre-Sales discounts
- Merch discounts

Blui's first role has been to work in **care homes and hospitals**. His current mission is to raise funds to complete **ReMeLife's Phase 2** build and launch, and to increase awareness of the benefits that ReMeLife provides for those involved in care.

The BLUI Meme token launches in August on **Uniswap**. Like all memes, it will be fun and have a life of its own. It will be a roller coaster, so buyers should be aware of the risks involved, as well as that it's all about care, carers and families.

So why not join Blui and ReMeLife. And prove that **#Crypto Cares!**
